Everything is so colourful here - the Jumbo Grip metallic colour pencils in three new colours

The dark winter days seem never-ending. Don't even think about going outside with the kids. So what to do with the little darlings? Put colour pencils in their hands and let them start drawing. With the Jumbo Grip metallic colour pencils in cooper, steel blue and green, Faber-Castell gives new incentives to use paper as a powerful outlet. Designed as a supplement to the already-launched Jumbo pencils in gold and silver, dazzling masterpieces can be created on white, coloured or even dark sheets of paper. Aimless creativity. And you? You can finally sit back and rely on the power of childhood fantasy, which loses kids in space and time.
